Small steps... Big impact!

Together for a better and safer internet!

students aged 11–16 from different European countries. The project aims to introduce students to Artificial Intelligence in an engaging, creative and age-appropriate way. Through international collaboration, games, puzzles, podcasts, digital activities and an eBook, students will explore how AI is used in everyday life and learn how to use it safely, critically and responsibly. The project will also develop students' English communication skills and strengthen their sense of European citizenship. The activities will culminate in a collaborative eBook entitled: "AI Detectives' Guide to Responsible AI"
